📍 Belgrade, Serbia

Summary

Resourceful and devoted Full Stack Software Developer with over 3 years of hands-on experience in new technologies focused on creating efficient and scalable code, underpinned by a solid twelve-year foundation in design.

Work Experience

Full Stack Developer (05/2021 — Present)

- Developing custom websites with React, HTML, CSS, and JavaScript for clients like itbridge-services.com, achieving a 200% increase in client base through enhanced digital presence.
- Collaborating closely with stakeholders to gather feedback and iteratively improve the application's features and functionalities.
- Enhancing user-centric design by architecting and launching fully responsive, mobile-first websites using Figma for wireframing, significantly improving user experience and modernizing client aesthetics.
- Modernizing and optimizing web assets by upgrading the [Portfolio Website](#) from outdated WordPress themes to React, improving performance metrics and leveraging cutting-edge technologies for better SEO and site maintainability.

Upwork (08/2012 — Present)

Industrial Designer | CAD | 3D Artist

- Maintaining Top-Rated Plus status on Upwork with a perfect 100% Job Success Score, earning over 180 five-star reviews, demonstrating a consistent track record of client satisfaction and high-quality deliverables. [View my profile](#)
- Demonstrated proficiency in meeting tight deadlines with a 95% on-time delivery rate.
- Led the design and development of over 15 custom outdoor furniture pieces, achieving a 100% client satisfaction rate.
- Spearheaded the design and launch of a new product line, collaborating with other designers to achieve a 25% sales increase in the first quarter.
- Enhanced 3D modeling workflows, achieving a 20% reduction in project completion times without sacrificing quality, in partnership with a cross-disciplinary design team.

Skills

Programming Languages

JavaScript (ES6), TypeScript, HTML, CSS/Sass, SQL

Libraries & Frameworks

Node.js, Express, React, Next.js, jQuery, EJS, Redux, D3, Styled Components, Framer Motion, Tailwind CSS, Bootstrap

Database Management

MySQL, PostgreSQL, MongoDB

Tools & Platforms

Git, GitHub, Netlify, Vercel, Render, Firebase, Supabase, Webpack, Jest

Design

Figma, Photoshop, Illustrator, inDesign

Education

Computer Software Engineering

freeCodeCamp, 2022

Master Engineer of Wood

Technologies

Faculty of Forestry, University of Belgrade, 2010

Certificates

Upwork Skill Certification –

3D Modeling

Upwork, 2021

Data Structures & Algorithms, Responsive Design

freeCodeCamp, 2022

Selected Projects

Goddess Within – eCommerce App

[Github](#) | [Demo](#)

- Developed an eCommerce application designed to facilitate the purchase of wardrobes and related products.
- Utilized Node.js, Express.js, and MongoDB to achieve a 50% reduction in server response times.
- Designed a user-friendly and visually appealing interface using React Bootstrap, React Select, and Font Awesome.
- Implemented React along with Redux Toolkit for state management and React Router, enhancing the user experience and increasing user retention by 40%.

Melody Mingle – Music Streaming App

[Github](#) | [Demo](#)

- Constructed a Next.js-based music streaming app aimed at allowing users to discover and listen to a wide variety of music, integrating Stripe to handle subscriptions. Applied Tailwind CSS for styling, boosting the app's load efficiency and aesthetic appeal.
- Implemented TypeScript to leverage static typing, significantly improving code quality and reliability by catching errors at compile time.
- Developed the platform using Supabase and PostgreSQL, ensuring high interactivity and a responsive experience.
- Created custom hooks to encapsulate and reuse common logic throughout the application.

New Horizon – Real Estate App

[Github](#) | [Demo](#)

- Built a real estate management application to help users buy, sell, and rent properties.
- Developed using the MERN stack with Redux Toolkit and Redux Persist, improving application stability and user session time by 25%. Employed Tailwind CSS to ensure a superior and efficient user interface for real estate management.
- Implemented JWT, Firebase, and Google OAuth for secure authentication and authorization processes.
